Skyline Base for flexible belt. 360 Degree angle adjustable	Flexible Stainless belt for LED Strip Cuttable by scissor Belt Width :20mm(0.787in) Applicable width of led strip: <10mm(0.394in)	Scissor for cutting Stainless belt

Installation Procedure

			
On the installation wall, drill 3 ϕ 10mm(0.394in)holes with a distance of 40mm(1.58in), and install the Plastic plug	Connect the DC wire to the terminal of the bottom box. The wire is recommended to be 16 20AWG single copper wire.	Paste the LED strip on the steel strip, the beginning position should be 60mm(2.36in)away from one end of the steel strip.	Fix the steel strip to the screw rod. The steel strip which side with a quick plug terminal should be fixed to the screw rod marked A.
			
Put the rotary rod through the bottom box, and fix the bottom box onto the wall. Please fix the rotary rod marked A to the bottom box with terminals.	Measure the distance(L) between the installation walls with wire rope, and the cutting length(X) of the steel strip should be 240mm(9.45in)shorter than L.	Fix the screw rod with the rotary rod. Tighten the steel strip by turning the rotary rod.	Plug the quick plug terminal into the bottom box.

! Announcement

Please notice that the strips are not bendable to all directions. As the appropriate specific shape and degree, please follow the following instruction:

Correct bending way

Face to the light surface, fold the strip the minimum bending diameter is 70mm

light surface upwards, the strip is bendable to right or left naturally, the minimum bending diameter is 80mm

Incorrect Bending Way

Face to the side surface, (as the picture shows) do not bend downward damage the strip.

(as the picture shows) please do not twist the strip, or it will be damaged

LED strip are low voltage products, you must use the power supply(transformer). Do not connect the LED Strip directly to the AC 110v or AC 220v, otherwise it will burn out the LED Strips and lead to safety (security) accidents.

Please read the specifications thoroughly before installation by professional staff to make sure the safe use.

Installation accessories

Screws, fixed clips, glue, plug

Installation instructions

Prepare the screws and fixed clips

Adjust the fixed clips to the appropriate place, use a screwdriver to fix the screw.

Put the light emitting surface upwards, then insert the LED strip into the fixed clips

Fix led strip completely into the fixed clip, led strip surface must be parallel to the top edge of fixed clip
